 Melbourne FL 32940

Please Note: Mammography is an accurate method of detecting breast cancer. However, you should understand mammograms are not 100% effective. Many cancers can be seen on mammograms but not felt on physical exam. Up to 10% of cancers are not detected on mammography. Therefore, if you have not had a recent breast exam, you should make an appointment for such an examination.

### Breast Imaging Worksheet

<b>Patient:</b>	<b>DOB:</b>
<b>Phone #:</b>	<b>Date:</b>
<b>Referring Doctor(s):</b>	<b>MR#:</b>
<b>Insurance:</b>	Please provide email address for results _____
<b>List other physicians you would like to receive your results:</b>
